

Going Green Around the House (and Campus) March 2019

This month, the Green Team is going to be focusing on more ways for us to practice being “green” around school and in our homes.

Creating a “green” campus and backyard:

1. Compost
2. Grow you own garden
3. Use natural or organic insect control
4. Plant flowers and bushes native to Florida

What to do with all your “stuff”?

1. Swap clothes, books, toys, etc with a friend
2. Donate “stuff” you’re done with to a reputable organization
3. Think before you buy...is this a “want” or a need”?

How to eat “green”?

1. Meatless Mondays
2. Use compostable coffee pods for your Keurig
3. Buy in bulk

How to clean “green”?

1. Use natural cleaners, like vinegar, baking soda and ammonia.
2. Use a cloth rag and a homemade spray
